

Roshaan Siddiqui

Full-Stack | Front End Focused | Web Developer | Angular, React, Next.js, NodeJS

I am a **full-stack** developer with a focus on **front-end** development and proven expertise in **Angular, React, and Next.js**. Over the past 4+ years, I've consistently delivered high-value and complex solutions across multiple web projects, working with both Front-End and Full-Stack technologies.

Work History

Contractual work

01/2025 - Present

Jayu Portal - Merchant portal to set up loyalty programs for restaurant business owners.

- **Angular, RxJS, and PrimeNG** were used to create multiple screens and components
- Followed Figma Designs to create a responsive web app
- Lead the Front End Development for the project - 1000+ hours worked.

Techlogix (PVT) Ltd - Lahore

07/2021 - 07/2025

Senior Software Engineer 06/2023 - Present

Awarded AI - AI assistant B2B SAAS for assisting in the solicitation and processing of government contracts.

- Coded in **NextJS 14** with **Vercel** and **Supabase**
- Used **ShadCN**, **Syncfusion** and **TailwindCSS** to create multiple pages and components
- Developed APIs in **Next** and **NestJS**.
- Created a Kanban board that represented progress pipelines for each contract for individual teams
- Completed Paginated and Filterable tables for filtering of data for better user experience

HP-NiceLabel - HP™ web application for creating and editing labels with barcodes

- Used **Angular 16** with **Material UI**, following **JustInMind** Design.
- Worked on **HTML5 CANVAS**, using the open-source library **Konva** to create the editor.
- Solved complex mathematical problems to enable transformations like page zoom, object resize, drag and drop
- Implemented a custom text editor

AI Fardan Exchange - Financial Management System web application

- Worked using **Angular 16**, **Kendo** and **MaterialUI**
- Followed **Figma** to make accurate responsive designs, coded 2 modules, each consisting of 6 CRUD screens.

Senior Software Engineer 07/2021 - 06/2023

Atlas HXM - Large Scale **HR Management System** using **ReactJS** and testing with **JEST**

- **ReactJS 17**, **JavaScript/Typescript**
- Writing **unit tests** and **integration tests** using Jest with RTL
- Also working as the **Front End lead** on the former Angular Project.

Authentix(Digitrax Track and Trace Project)

- Developed a **Web Application** using Angular 13. Focused on **implementing new features** in accordance with **client requirements**.
- Built Components with **HTML/SCSS/TS**
- Use **KendoUI** for components like **grid**, **drawer**, and **dialogues**
- Integrated and worked with **Google Maps** and **Leaflet**

Skill Set

- **JS/TS | Angular | NextJS | ReactJS 17 | Testing (Jest + RTL) | HTML5 | Fullstack | Supabase | Vercel**
